

To whomsoever it may concern

We were in a process of evaluating and finalizing the suitable technology partner for our requirement of Video Conferencing Infrastructure solution for our Telemedicine application and Audio Visual requirements. To address our requirement of seamless backward and forward integration of hardware and software based video conferencing, we had evaluated various leading brands and technology available in the video conferencing industry, and the solution provided M/s Godrej and Boyce Mfg. Co. Ltd turned out to be the best in terms of quality, interoperability by adhering to ITU standards. It is with the Lifesize Video Conferencing Infrastructure solution proposed by M/s Godrej & Boyce Mfg Co Ltd; we could establish a strong Telemedicine collaboration platform through which we could make our Medical / Surgical Equipments talks to the external world. Unlike other system that was being evaluated, Lifesize solution allows us to create virtual meeting space by seamlessly connecting our Software based Video conferencing Client with our room-based video conferencing infrastructure and our medical equipments. We are also completely satisfied with the facilities like Recording, Live streaming & On-demanding Streaming which makes our Video Conferencing system perfect in terms of Collaboration, Data Management & Learning and Development.

The support that has been given by M/s Godrej & Boyce Mfg Ltd in pre and post sales activity during our product trails and Live Surgery session is truly professional. We appreciate their technical expertise and the team's ability of identifying and proposing ideal solution as per our requirement.

All the best & Keep up your good work always!

Thanks & Regards

Sunil Salim
Asst. Manager IT
